HOSPICE WEEK 5-12 MAY

Hospice week highlights the role of partnership in providing support and care for people with life threatening illnesses. The activities of this week seek to recognise, share and celebrate the achievements of hospice and palliative care programmes with their partners.

Hospice week also highlights the importance of an effective partnership between family members, carers, service providers, government departments and other stakeholders as vital to the provision of quality care.

Hospice is a movement represented across the globe that believes that everybody with a life threatening condition has the right to quality life and dignity in death.
